fib bulletin 34 addresses service life design sld for plain concrete reinforced concrete and pre stressed concrete structures with a special focus on design provisions for managing the adverse effects of degradation its objective is to identify agreed durability related models and to prepare the framework for standardization of performance based design approaches four different options for sld are given a full probabilistic approach a semi probabilistic approach partial factor design deemed to satisfy rules avoidance of deterioration the service life design approaches described in this document may be applied for the design of new structures for updating the service life design if the structure exists and real material properties and or the interaction of environment and structure can be measured real concrete covers carbonation depths and for calculating residual service life the bulletin is divided into five chapters 1 general 2 basis of design 3 verification of service life design 4 execution and its quality management 5 maintenance and condition control it also includes four informative annexes which give background information and examples of procedures and deterioration models for the application in sld the format of bulletin 34 follows the ceb fip tradition for model codes the main provisions are given on the right hand side of the page and on the left hand side the comments note an italian translation of bulletin 34 is also available contact us for further details

the purpose of this book is to explain the philosophy set out in eurocode 7 the new european code of practice for geotechnical design and by means of series of typical examples to show how this philosophy is used in practice this book is aimed at practising engineers to assist them to carry out geotechnical designs to eurocode 7 using the limit state design method and partial factors lecturers and students on courses where design to eurocode 7 is being taught it is envisaged

that practising engineers using this book to assist them carry out geotechnical designs to eurocode 7 will have access to the prestandard version of eurocode 7 env 1997 i so the authors have concentrated on the main principles and have not provided a commentary on all the clauses however sufficient detail has been included in the book to enable it to be used on its own by those learning the design principles who may not have access to eurocode 7 for example the values of the partial factors and the principal equations given in eurocode 7 have been included and these are used in the design examples in this book to assist the reader the numbering layout and titles of the chapters closely follow those presented in eurocode 7

neuro symbolic ai is an emerging subfield of artificial intelligence that brings together two hitherto distinct approaches neuro refers to the artificial neural networks prominent in machine learning symbolic refers to algorithmic processing on the level of meaningful symbols prominent in knowledge representation in the past these two fields of ai have been largely separate with very little crossover but the so called third wave of ai is now bringing them together this book neuro symbolic artificial intelligence the state of the art provides an overview of this development in ai the two approaches differ significantly in terms of their strengths and weaknesses and from a cognitive science perspective there is a question as to how a neural system can perform symbol manipulation and how the representational differences between these two approaches can be bridged the book presents 17 overview papers all by authors who have made significant contributions in the past few years and starting with a historic overview first seen in 2016 with just seven months elapsed from invitation to authors to final copy the book is as up to date as a published overview of this subject can be based on the editors own desire to understand the current state of the art this book reflects the breadth and depth of the latest developments in neuro symbolic ai and will be of interest to students researchers and all those working in the field of artificial intelligence
